SUMMARY

Analytical and results-driven **Computer Science undergraduate** skilled in **engineering scalable backend systems, AI-driven automation, and program coordination**. Experienced in **distributed systems, cloud-native application development, and API integration**, with proven ability to collaborate across engineering and business teams. Passionate about **process optimization, workflow automation, and data resilience engineering**, aligning with Rubrik's mission of secure and scalable cloud data management.

PROFESSIONAL EXPERIENCE

Software Engineer Intern - Larsen & Toubro Technology Services (LTTS) Chennai, Jun- Aug 2025

- Designed and implemented **microservices-based backend systems** handling **5,000+ events per second** using **Python, RESTful APIs**, and the **ELK Stack** for distributed analytics and observability.
- Developed a **Threat Contextualizer service** achieving **sub-100ms latency**, enabling faster incident response and real-time system monitoring within enterprise SIEM workflows.
- Integrated the **MITRE ATT&CK** framework into **security correlation APIs**, enhancing **automation** in threat intelligence enrichment pipelines.
- Improved **system performance** and reduced analyst **triage time by 30%** through **database indexing, caching optimization, and efficient query design**.

Heuristic Labs – AI & ML Intern

Remote, Sep 2025 – Present

- Leading the development of **multi-architecture GEN AI assistants** using **Retrieval-Augmented Generation (RAG)** and **vector databases** like Mem0 and Zep to support intelligent automation and data retrieval.
- Built **workflow automation pipelines** integrating **Supabase, LLM-based agents**, and **monitoring dashboards** for **knowledge management** and **cross-functional data sharing**.
- Developed **self-learning AI systems** with **human fallback routing**, improving customer experience and ensuring **continuous model improvement**.

PROJECT EXPERIENCE

Campus Sense -AI Powered Event Management System | [LINK](#)

July 2025

- Architected distributed backend infrastructure supporting concurrent users and real-time analytics dashboards for multi-campus event management.
- Designed and deployed REST APIs for event workflows, user authentication, and approval processes using React, Node.js, Express, Flask, and Supabase in a cloud-deployed environment.

AI Mock Interviewer – Adaptive Technical-Interview Coach| [LINK](#)

May 2025 - June 2025

- Developed an adaptive AI interviewer that generates dynamic, role-specific technical questions using LLM integration and real-time analytics.
- Implemented anti-cheating detection with computer vision APIs and behavioral monitoring to ensure integrity in interview simulations.

EDUCATION

Kumaraguru College of Technology

Coimbatore, India

Bachelor of Computer Science and Engineering | CGPA: 8.79

Graduation Date: May 2027

CORE TECHNICAL SKILLS

- Languages & Frameworks:** Python, Node.js, Java, JavaScript, Flask, Express.js, RESTful APIs, Microservices
- Databases:** MongoDB, MySQL, Supabase, Vector Databases (Mem0, Zep)
- Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, Linux, ELK Stack, CI/CD
- AI & Automation:** Retrieval-Augmented Generation (RAG), LLM Integration, Conversational AI, Workflow Automation
- Tools:** Git, Postman, Jira, Confluence, Google Colab
- Expertise Areas:** Distributed Systems, Cloud Infrastructure, Data Resilience, Observability, Program Execution

AWARDS & ACHIEVEMENTS

- Top 35 Finalist**, HappyFox Hackathon 2025 – AI-Powered Software Solution
- Shortlisted**, Google Girl Hackathon – International Technical Excellence
- Top 25 Finalist**, Hack for Impact – Global Tech-for-Good Challenge
- Star of Maatram Award**, Academic Excellence & Leadership (2025)
- 200+ Coding Challenges Solved**, LeetCode & GeeksforGeeks

LEADERSHIP EXPERIENCE

GDG On Campus KCT (Event and Community Lead)

Jan 2025 - Present

- Leading technical workshops focused on backend development, API design, and system architecture. Managing end-to-end project execution including budgeting, scheduling, and collaboration with industry experts

TECHNICAL PORTFOLIO | [Portfolio](#) | Highlights technical projects, hackathon and achievements
